

Test Log: Component Testing of AccountSettings Module

Date: February 25, 2024

Test Case: Rendering of UserInfo and EditPassword Components

Test Description:

The objective of this test is to verify that the UserInfo and EditPassword components are rendered correctly within the AccountSettings module.

Testing Methodology:

1. *UserInfo Component Rendering Test:*

- Render the AccountSettings module wrapped in a MemoryRouter.
- Verify that the UserInfo component is rendered.

2. *EditPassword Component Rendering Test:*

- Render the AccountSettings module wrapped in a MemoryRouter.
- Verify that the EditPassword component is rendered.

Results:

1. UserInfo Component Rendering Test:

- The UserInfo component is rendered successfully.

2. EditPassword Component Rendering Test:

- The EditPassword component is rendered successfully.

Test Pass/Fail: Pass

Conclusion:

Both the UserInfo and EditPassword components are rendered correctly within the AccountSettings module, indicating that the rendering functionality is working as expected.
