Project Progress	• Demonstrated the chat page with updated UI design.
Dr. Yow's Feedback	• Progress looks good. • The new chat UI is looking good! • When the ASL word is detected and it is the desired word, may be add a "go" button, instead of making the user wait for translations. • The team should incorporate a "how-to use" document for the chat for users to easily understand the functionality of the application. • Focus on implementing the two-way chat functionality, as chat is the primary feature of the project. • Resources is a good addition to the project, should not scratch the idea. But should not be the priority at this time.
